SUMMARY

Second-year Computer Science student and developer with experience building full-stack web applications and data-driven security systems. Skilled in JavaScript ecosystems, Next.js, and backend services. Interested in web development, DevOps, and cybersecurity, with a focus on building scalable and reliable systems.

TECHNICAL SKILLS

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express.js

Database & Backend Services: PostgreSQL, Supabase

Programming Languages: JavaScript, Python, C++

Tools & Deployment: Git, GitHub, Vercel

PROJECTS

Aegis-Twin (Cybersecurity Digital Twin Dashboard)

Tech Stack: Python, PyTorch, Streamlit, Plotly, SQLite

- Built an IoT security dashboard simulating enterprise device fleets and monitoring network behavior.
- Implemented an LSTM autoencoder for anomaly detection using traffic feature analysis.
- Designed real-time dashboards with threat logs, gauges, and radar charts.
- Developed a trust score system combining reconstruction error and statistical drift analysis.

Tutor Platform (Two-Sided Tutoring Marketplace)

Tech Stack: Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS

- Built a marketplace connecting parents and tutors with role-based authentication.
- Implemented tutor qualification tests before applying to jobs.
- Developed secure dashboards using Supabase Row Level Security and protected routes.
- Deployed full-stack application on Vercel using server components and server actions.
